EDUCATION

California State University, Long Beach
Bachelor of Science in Computer Science - 3.75 GPA

Long Beach, CA
Aug. 2019 – May 2023

PROJECTS

Marvel Comics Store | *Next.js, Typescript, SCSS Modules*

- Developed a full-stack e-commerce web application using Next.js
- Used Fetch API to retrieve data and implement a search feature with the Marvel Comics API

Museranker | *React, Node, Express, MongoDB, SCSS*

- Developed a full-stack web application to create music rankings for music fanatics with Express serving a REST API and React as the front-end
- Implemented a search feature to find songs, albums, and artists and OAuth authentication using the Spotify API
- Store and fetch user data using Mongoose and MongoDB

Batch | *Kotlin, Firebase*

- Collaborated with a small team to develop a full-stack Kotlin mobile application to expand social relationships for groups
- Developed the algorithms to filter and fetch, accept and reject, and vote and match with groups
- Used Firebase to store and fetch group and user data
