EDUCATION

California State University Long Beach
Bachelor of Science in Computer Science - 3.75 GPA

Long Beach, CA
August 2019 – May 2023

PROJECTS

Chronic Disease Indicators | *React, ASP.NET Core, C#, SQL, SCSS Modules*

- Developed a full-stack web application for managing chronic disease indicator data from the Center for Disease Control and Prevention with a React front-end and .NET back-end connected to a PostgreSQL database
- Used REST API and ASP.NET Core MVC (Model-View-Controller) to add, fetch, update, and delete data from the database
- Implemented a feature for the user to sort and filter the data based on different factors such as disease category, location, gender, race/ethnicity, etc.

Batch | *Kotlin, Firebase*

- Collaborated with a small team to develop a full-stack Kotlin mobile application to expand social relationships for groups
- Developed the algorithms to filter and fetch, accept and reject, and vote and match with groups
- Used Firebase to store and fetch group and user data

Museranker | *React, Node, Express, MongoDB, SCSS*

- Developed a full-stack web application to create music rankings for music fanatics with Express serving a REST API and React as the front-end
- Implemented a search feature to find songs, albums, and artists and OAuth authentication using the Spotify API
- Store and fetch user data using Mongoose and MongoDB

LEADERSHIP EXPERIENCE

Website Administrator

August 2021 – May 2022

CSULB Pilipino American Coalition

Long Beach, CA
